

Simply Saving Lives

Automated External Defibrillators (AED) are so simple to use, they can be used by virtually anyone. You do not need to be a medical professional. Every AED walks a rescuer through the event from the time the AED is turned on, until Emergency Services arrive, using both visual and voice prompts. Simple graphics on the AED and clear voice commands, guide the rescuer through a Sudden Cardiac Arrest (SCA) event.

5%
Survival Rate
without
Defibrillation

74%
Survival Rate
with
Defibrillation

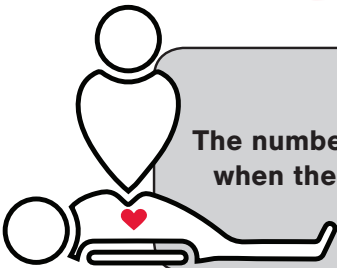

3 - 5
The maximum number of
minutes before a shock
from an AED should be
delivered to a SCA victim.

4 - 6
The number of minutes
before the brain begins to
die due to lack of oxygen
and blood.

10 - 13
The average number of
minutes before
Emergency Services
arrive at the scene.

1 in 3
The number of victims who survive
when the arrest is witnessed by
a bystander.

90%
The rate of mortality
from a SCA without
defibrillation.
